## Foreword

Due to inadequacy of manpower, this issue of *Natural Rubber Trends & Statistics* comes without providing the usual detailed analytical report of rubber market. This covers only the updated data as reported by member governments in mid-July.

Ms. Soon Jin Lam, a fresh Masters in Monetary Economics from Malaysia has just joined the Secretariat as Research Officer following the resignation of Ms. Sri Nuryanti, Economist. These changes have happened at a time when this small secretariat is preoccupied with the preparations for the Annual Rubber Conference, Assembly and meeting of three committees to be held from 2 to 9 October.

Continued support being received from statistical correspondents in member governments are once again acknowledged with immense gratitude.

**Notes**

<sup>(1)</sup> In the case of China, the supply side does not include the NR-content in compound rubber imported into the country (Please refer to Table 11 for the detailed data). But, the Demand side includes compound rubber consumed in the country. This partly explains the mismatch between the two sides.

<sup>(2)</sup> Malaysia's Demand side does not include the quantity of NR processed into compound rubber and exported from the country (Please refer to Table 13 for data of compound rubber exported). Therefore, the two sides need not match each other.

<sup>(3)</sup> For the Philippines, the supply side as well as the demand side does not include stock data due to non-availability.

\* Indicates non-availability of the data with the government.
